'Atos Origin, Cassis team for mobile NFC services in Europe'

(DMeurope Via Acquire Media NewsEdge) Atos Worldline, electronic transactions division of global IT services provider Atos Origin, has announced a partnership with NFC and TSM products supplier Cassis International. The aim of this agreement is to implement complete solutions enabling service providers to deploy innovative and secure contactless applications (payments, transport season tickets, loyalty cards, authentication, etc.). This alliance will aid the deployment of complex NFC services in Europe. This agreement is concluded within the context of ongoing projects which is Atos Worldline is delivering to develop applications for secure contactless electronic transactions. Cassis brings its range of Trusted Service Management (TSM) solutions and services and its expertise in the field of NFC solutions, enabling the deployment and extended management of the lifecycle of applications securely integrated into mobile phones on all types of secured elements (SIM cards, SD cards, onboard OS).
